

CHRYSTOSTOMOS ANTONIOU

.NET SOFTWARE DEVELOPER

Nicosia, Cyprus • +357 96 460 190 • chrysostomosantoniou77@gmail.com
[GitHub Repositories](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science graduate and current MSc Artificial Intelligence candidate with commercial experience designing, developing and maintaining .NET-based web applications in C# and SQL. Comfortable across the full stack — object-oriented C# on the back end, relational database design and query optimisation, and HTML5, CSS and JavaScript on the front end. Has delivered production applications end-to-end, from architecture and data modelling through REST API integration, automated system testing and Git-based release management. Fluent in Greek and English, with a strong appetite for learning, taking initiative and growing within a collaborative engineering team.

CORE TECHNICAL SKILLS

- **Languages & .NET:** C#, .NET — object-oriented design with a focus on clean, maintainable and scalable code; C++, Java, Python, Dart, TypeScript
- **Web & APIs:** RESTful API design and integration, JSON, XML, HTML5, CSS, JavaScript
- **Databases:** SQL — query writing, updates, schema design and performance optimisation; PostgreSQL
- **Testing & Quality:** System test validation, automated unit and integration testing, regression suites, code reviews, debugging and troubleshooting
- **Version Control & CI:** Git and GitHub, branching and pull-request workflows, GitHub Actions CI pipelines
- **Security & Cloud:** Basic application security practices, authentication and row-level access control, automated dependency and security scanning, cloud-hosted backends
- **Documentation:** Technical documentation of developed code, implemented functionality and system design

PROFESSIONAL EXPERIENCE

Software Developer | ZEBRA Consultants

06/2025 – 12/2025

Nicosia, Cyprus • C#, .NET, SQL, HTML

- Developed and maintained features for existing web applications according to functional and technical specifications, working across both back end and front end using C#, HTML and SQL.
- Maintained and extended production software to ensure smooth day-to-day operation, improve the user experience and continuously enhance application capabilities.
- Supported database management tasks including writing and tuning queries, applying data updates and optimising query performance.
- Performed bug fixing and system testing of delivered code, validating changes before release to ensure stability.
- Participated in code reviews and team system updates, contributing to code quality and shared engineering standards.

Computing Teacher | Pascal Education

12/2025 – 07/2026

Nicosia, Cyprus

- Delivered engaging Computing lessons in programming, computer science and digital skills to students of varying abilities.
- Explained technical concepts clearly in both Greek and English, building students' problem-solving ability and confidence with technology.
- Planned lessons and classroom activities, demonstrating strong communication, interpersonal and organisational skills with students and staff.

Machine Learning Intern | IQ3SOLAR

07/2024 – 09/2024

Limassol, Cyprus • Python, machine learning, data engineering

- Forecast solar power generation using machine learning models and weather data, delivering day-ahead and multi-day production forecasts.
- Handled data management tasks — collecting, cleaning and preparing large weather and production datasets for model training and evaluation.

Security Systems Technician | A.A. Protecta Private Security Services Ltd

06/2022 – 08/2022

Nicosia, Cyprus

- Installed and configured security systems and programmed camera hardware on client sites.

Infantry Soldier | National Guard of Cyprus

07/2018 – 09/2019

Nicosia, Cyprus

- Completed mandatory 14-month national service, building discipline, responsibility and adaptability, and strengthening communication and collaboration skills within a diverse team.

TECHNICAL PROJECTS

FootRank — Cross-Platform Football Application

Personal Project

Flutter, Dart, PostgreSQL, REST APIs, GitHub Actions • github.com/Chrysostomos77Antoniou/footrank

- Designed the architecture and shipped a production application end-to-end for organising matches, ranking teams and booking courts — defining the data model, API layer and feature roadmap from business requirements.
- Modelled a relational PostgreSQL schema and secured it with row-level security policies, applying basic application security practices for authentication and per-user data access.
- Integrated RESTful APIs with JSON payloads for all client-server communication, including real-time team ratings, match proposals, team invites and court-booking workflows.
- Wrote automated unit and integration test suites, including regression coverage for score submission and match-proposal flows, and ran them as system test validation in a GitHub Actions CI pipeline alongside an automated security scan.
- Maintained and continuously enhanced the application through versioned releases (currently v1.0.9) using Git branching and pull-request workflows, with technical documentation maintained alongside the code.

Mission Control — Agent Operations Dashboard

Personal Project

Next.js, TypeScript, REST APIs • github.com/Chrysostomos77Antoniou/MissionControl

- Built a web dashboard that runs autonomous agents to research, draft and act on product growth goals, with a mandatory human approval gate for high-risk actions.
- Implemented the front end in TypeScript against REST endpoints, applying clean separation between the UI, service and data layers.

CRM / Admin Panel

Personal Project

Flutter Web, PostgreSQL

- Developed an internal web admin panel for managing users, teams, courts and match data, covering full CRUD operations over a relational database.

EDUCATION

MSc Artificial Intelligence | University of Cyprus

09/2025 – Present

Nicosia, Cyprus

BSc Computer Science | University of Piraeus

09/2019 – 02/2025

Piraeus, Greece • Grade: 7.32 / 10

- Comprehensive Computer Science programme covering software engineering, web development, databases and cybersecurity, with proficiency developed in C#, C++, Java and Python.
- Key modules: Database Management Systems, ERP/CRM Systems, Modern Software Technology — Software for Mobile Devices.
- Dissertation: designed, built and deployed a mobile application — awarded a grade of 10 / 10.

Apolytirion (High School Diploma) | Saint Varnavas Lyceum

09/2015 – 06/2018

Nicosia, Cyprus • 15.75 / 20 ("Very Good") • Computer Science, Physics, Mathematics

LANGUAGES & CERTIFICATIONS

- **Greek:** Native
- **English:** Fluent — IGCSE English as a Second Language (Grade C)
- **ictEurope (Intermediate):** Databases, General Computing, Internet Services

INTERESTS

Football — two years in the Olympiakos Nicosia academies and one season as a semi-professional player for Ethnikos Latsion (2017/18). Muay Thai, gym and music.
